Dear Dom:

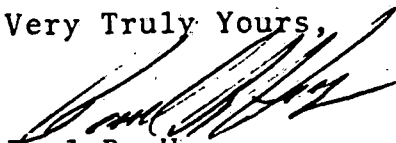

Supervisor Mc Corquodale's motion regarding the proposed odd-even gasoline distribution program included a plan for implementation on a mandatory basis when allocation percentages reach 85%.

We would like further clarification of specifically what must occur in the marketplace for the odd-even plan to be implemented. Allocation fractions for the major brand refiners for March and April are as follows:

	<u>March</u>	<u>April</u>
Chevron	100%	95%
Shell	95%	85%
Mobil	100%	95%
Union	100%	95%
Arco	95%	95%
Texaco	90%	85%
Exxon	100%	95%

Two of the majors are already at 85% (Shell & Texaco) and we are expecting Chevron to be at 85% on May 1, 1979. Will the odd-even plan be implemented at that time or do we wait for all companies to reach 85% or less?

Very Truly Yours,

Paul R. Hay
Executive Director
